

## Short CV: Boris Reizis

---

Boris Reizis, Ph.D., did his thesis research in immunology with Irun R. Cohen at the Weizmann Institute, and trained as a postdoc with Philip Leder at Harvard Medical School. In late 2003 he started his lab at Columbia University, where he became a tenured Associate Professor in 2010 and a Professor in 2014. In 2015 he joined New York University School of Medicine (NYUSoM) as a Professor in the departments of Pathology and Medicine. Boris is the director of NYUSoM Immunology and Inflammation Training program and the co-Director of the Colton Center for Autoimmunity. The Reizis lab studies molecular control of normal and malignant hematopoiesis, immune system development and immune function, with a particular focus on dendritic cells.
